

SEMI-INDUSTRIAL OZONE GENERATOR - N°2

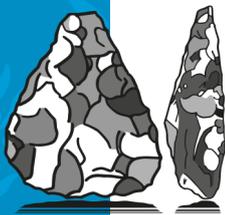

Ultra-portable professional ozone generator thanks to its light weight, handle and compact design. Ideal for airborne surface disinfection and air sanitization. Disinfects air conditioning systems. Neutralizes odors. Eliminates micro-organisms.

Treatment time depends on volume. For vehicles (treatment time for a car: 10 minutes, for a bus: 15 to 25 minutes), public reception points, shops, hotel lobbies, cafés-restaurants, canteens, guest rooms, medical centres, classrooms, gyms, changing rooms...

Questions or other needs? Please contact us!

READ CAREFULLY THE MANUAL BEFORE USE

Designed for shock disinfection. Do not use in the presence of people or animals. Wait at least 20 minutes before entering the treated room and ventilate thoroughly. Will not be effective if humidity exceeds 80% and temperature exceeds 35°C.

Electric power: 110W
Ozone production: 24g/h
Operating humidity: 35-80%.

Noise level: 60 dB

Timer up to 60 minutes

Treatment capacity: 350 m³

Current: 220-240 V / 50 Hz

Weight: 3.9 kg

Dimensions: 30.2 x 16.5 x 20.2 cm

Durable steel case

Examples of processing times :

200 m³ room: 60 min

Private vehicle : 10 min
